

GENOPLANTE OTL QUALITY ASSESSMENT QUESTIONNAIRE

Many thanks for ordering rice insertion lines from the Genoplante OTL library.
Would you be so kind in taking few minutes from your time to fill in this questionnaire:
this will help us improving our service in the future.

1. From where have you heard of the Genoplante OTL library?

Genbank accession
Genome navigators OrygenesDB others
Forward search (Oryza Tag Line)
Publications
Presentations

2. Was the information to order seeds provided on the OTL web site clear enough?

Yes No

3. Were the downloadable forms (MTA and order form) easy to fill?

Yes No

4. Were the procedure steps and documents needed to gain access to seeds clearly described?

Yes No

5. Please could you roughly evaluate the time between your order and seed reception.

1 month 2-3 months 3-6 months no reply to my order

6. Did you find the time necessary to receive the seeds:

Too long Satisfactory I never get the seeds

7. Can you compare our service with that of other rice insertion libraries:

Faster Slower About the same

8. How many different lines have you ordered from the library? Line(s)

9. At reception, on average, did the seeds germinated well?

Less than 10% 10-50% 50-75% 75% to 100%

10. In case of several lines were ordered, was this % homogeneous or heterogeneous among the lines?

Homogeneous Heterogeneous

11. Which method did you use to identify homozygous plants?

PCR

Southern

12. Were you able to find back the insertion in the line?

Yes

No (please write down the line(s) untagged)

13. Based on your own experience, would you recommend OTL lines to a colleague?

Yes

No

14. Please freely comment on the quality of the service (congrats also acknowledged!) and suggestion for improvement
